I can be your queen of hearts
If you show me who you are
On white horses we can ride
Disappear into the night
All the starlight in the universe
Flash like diamonds in your eyes
You're a supernova
You always shine brighter
Than anyone

You, you're a supernova
You always shine brighter
Ooh baby than anyone
The world is waiting, open up your eyes
The world is waiting for the sun to shine
And each day will bring something
new on the horizon
Time is ticking, make the most of every minute, time is ticking

It's so electric here tonight
And so I'm heading out for the city life
I feel connected and it feels so right
Hear the sounds
All around, all around
Living a masquerade, Don't let the stardust fade away, 'Cause you can be who you want to be
Don't step on my groove
'Cause I just wanna move
I don't care what you do
But don't step on my groove

Nothing last forever
But I'll always remember you
Times we had together
Live on forever
Me and you

Stay wild, stay wild and free
You are, you are evergreen
The wind may blow but you'll never change
Your heart always remains the same

I wanted a cowboy by my side
I wanted a rodeo
I wanted somebody to make me smile
Someone to let me know
It's gonna be alright
